

## What your Servicesafe Scheme covers :-

- Annual Service Visit

### Breakdowns

- Priority attention
  - Free parts and labour on appliances
  - Radiants, coals and bulbs
  - Free parts and labour on full central heating system
  - Temperature, gas and safety controls
  - Main and pilot burners and internal gas-to-air heat exchanger
  - Primary connector to main flueing system
  - Flue fan, airflow proving device
  - Boiler-control printed circuit boards
  - Circulating pump
  - Radiators
  - Thermostatic or manual radiator valves
  - Pipework and fittings of central heating system
  - Feed and expansion tank
  - Expansion vessel, pressure guage, pressure relief valve, filling loop
  - Time clocks/programmers
  - Motorised diverter, mid-position or zone valves and associated pipework and wiring
  - Room thermostat
  - Cylinder thermostat
  - Hot water cylinder (if traditional vented type)
- Cylinder accessories (if unvented cylinder) - eg pressure reducing valve, temperature and pressure relief valves, thermostatic mixing valve, control and limit thermostats (NB: Replacement of “heatstore” cylinder itself excluded)
- Primary circuit from boiler to cylinder
  - Fan and associated motor
  - Grilles and registers
  - Ductwork
